

Kyushu Financial Group actively take risks for investment and financing (business, industry, and environment) centering on the local area in Kyushu and Okinawa toward the recovery of the local economy from infectious diseases and natural disasters and the realization of sustainable local community.

Risk Appetite Policy

- ① We make preferable choices to the maximum in investing and financing centered on the local area in Kyushu and Okinawa toward the recovery of the local economy from infectious diseases
- ② We value the balance between securing stable profits and the soundness and appropriateness of the management ("KFG Risk Management Basic Policy").
- ③ We make investments and loans which the risks are clearly defined, and eliminate to concentrate on specific risks due to overly focusing on profits.
